Guidelines for Home Quarantine

- Home quarantine is applicable to all contacts of a suspect case or contacts of a confirmed case of COVID-19.
- Person shall be placed in a well-ventilated single room. Limit the number of attenders. Assign only one person who is in a good health without risk conditions.
- Household members should stay in a different room and if it is not possible maintain a minimum of one (1) meter distance.
- The caregiver should wear a medical mask fitted tightly to the face when in the same room and especially during movement.
- Masks should not be touched or handled during use. If the mask gets wet or dirty with secretions, it must be changed immediately. Discard the mask after 6 hrs use and perform hand hygiene after removal of the mask.
- Hand hygiene- Wash hands frequently and thoroughly with soap and water after serving the quarantined person.
- Use disposable paper towels if available or else use dedicated cloth towel and replace them when wet. Wash thoroughly all the reusable items with household detergent.
- Follow respiratory hygiene - covering the mouth and nose during coughing or sneezing using medical masks, cloth masks, tissues or flexed elbow, followed by hand hygiene.
- Use disposable gloves to provide oral or respiratory care and when handling body fluids, stool, urine and waste.
- Persons with symptoms should remain at home until their symptoms are resolved based on either clinical and/or laboratory findings.
- Frequently touched surfaces such as bedside tables, bedframes and other furniture, bathroom and toilet surfaces should be cleaned and disinfected at least once daily with regular household disinfectant containing a diluted hypochlorite solution (1-part bleach to 99 parts water).
- The contacts should be advised to monitor their health for 14 days from the last day of possible contact and seek medical support if any symptoms are observed.
- For any queries please contact Helpline number 104.
- In case of onset of any symptoms (Fever/ cough/ difficulty in breathing/ body pains/ head ache/ vomiting/ diarrhoea) please call 104 immediately or contact your nearest Government Health Facility.
- Government of Telangana will release Media Bulletin twice a day with all relevant information on COVID19. Please do not believe/panic on seeing information at various social media platforms.
- There is no specific drug/ vaccine for COVID19. Prevention can be through social distancing, frequent hand wash, maintaining personal hygiene, cough etiquette and avoiding large gatherings.
